

CURRICULUM VITAE

Xusheng Wang, Ph.D.

Assistant professor
Department of Biology
University of North Dakota

Email: xusheng.wang@und.edu
Phone: 701-777-4673

EMPLOYMENT

Assistant Professor	Department of Biology, University of North Dakota	2019--
----------------------------	---	--------

ACADEMIC DEGREES

Ph.D.	Zhejiang University (China)/University of California, Davis (USA)	2006
M.S.	Zhejiang University (China)/International Rice Research Institute (Philippines)	2003
B.S.	Zhejiang University (China)	2000

PROFESSIONAL EXPERIENCES

Bioinformatics Group Lead	Center for Proteomics and Metabolomics; Department of Structural Biology, St. Jude Children's Research Hospital	2015—2019
Sr. Bioinformatics Research Scientist	Department of Structural Biology, St. Jude Children's Research Hospital	2014—2015
Bioinformatics Research Scientist	Department of Structural Biology, St. Jude Children's Research Hospital	2012—2014
Bioinformatics Research Associate	Proteomics Facility and Department of Structural Biology, St. Jude Children's Research Hospital	2011—2012
Director of Bioinformatics	Center for Integrative and Translational Genomics, University of Tennessee Health Science Center, USA	2010—2011
Research Associate	Department of Anatomy and Neurobiology, University of Tennessee Health Science Center, USA	2008—2011
Post-doctoral Fellow	Department of Anatomy and Neurobiology, University of Tennessee Health Science Center, USA	2007—2008
Assistant Professor Junior Scientist	Zhejiang University, China	2006—2007
	Education Aboard Program of University of California, Davis in China (Peking University)	2006—2007

Junior Specialist
Visiting Scholar

University of California, Davis, USA
International Rice Research Institute, Philippine

2005—2006
2002—2003

RESEARCH DIRECTIONS

- Computational proteomics and metabolomics
- Bioinformatics and computational biology
- Systems biology, integrative biology
- Quantitative genetics and Statistical Genomics
- Genetics of complex diseases

PROFESSIONAL SOCIETIES

- American Society for Mass Spectrometry
- International Complex Trait Consortium
- International Behavioral and Neural Genetics Society
- International Mouse Genome
- International Human Genetics Society

JOURNAL EDITOR AND REVIEWER

Editor

Frontiers in Genetics (In genetic disorders)
PLoS One
Metabolites

Associate Editor

Frontiers in Evolutionary and Population Genetics

Reviewer

Nature Communications, Cell Systems, Journal of Proteome Research, Proteomics, Bioinformatics, Nature Communication Biology, Molecular Metabolism, Metabolite, Acta Pharmaceutica Sinica B

TEACHING EXPERIENCES

Biostatistics	Zhejiang University	Spring 2007
Bioinformatics	China Jiliang University (Invited)	Spring 2007
Bioinformatics	Zhejiang Forest College (Invited)	Spring 2007
Bioinformatics	University of Tennessee, Health Science Center (Invited)	Spring 2010
Bioinformatics	University of Tennessee, Health Science Center (Invited)	Spring 2012
Bioinformatics	University of Tennessee, Health Science Center (Invited)	Spring 2014
Genetics	University of North Dakota	Fall 2019, 2021
Genomics	University of North Dakota	Spring 2020, 2021

ACTIVITIES & SERVICES

Internal advisor board	NSF stem; UND	2021-2024
External advisor board	NIH R24; University of Arkansas for Medical Sciences	2021-2026
Faculty search committee	Department of Chemistry, UND	2021
President	College Graduate Student Union, Zhejiang University	2001—2002
President	College Student Union, Zhejiang University	1999—2000

INVITED TALKS IN CONFERENCES

High-throughput sequencing of the DBA/2J mouse genome. UT-ORNL-KBRIN Bioinformatics Summit 2010. March 19-21, 2010. Lake Barkley State Resort Park Cadiz, KY.

Whole-genome sequence of DBA/2J and its use for reverse complex trait analysis. The 9th annual meeting of the Complex Trait Community. Chicago, IL, USA. May 2010.

Reverse genetics. The 5th symposium of animal and plant quantitative genetics and breeding. Chengdu, Sichuan, China. Sept 2011.

JUMP: A tag-based database search program for peptide identification by mass spectrometry. 5th International Conference on Proteomics and Bioinformatics. Aug 2014. (http://omicsonline.org/speaker/Xusheng_Wang_Research_Scientist_At_St_Jude_Childrens_Research_HospitalUSA_Proteomics2014/)

JUMPM: A Pipeline for Mass Spectrometry-based Identification of Small Molecules. UND, Department of Chemistry. Feb 20, 2021.

Protein Expression and its Regulation in Mouse Brain. UND Epigenetics group. April 27. 2021.

Genetic Architecture of Protein Expression in Rat Brain. NIDA Genetics and Epigenetics Consortium Meeting. March 8-10, 2021.

PUBLICATIONS

PATENT

Weiren Wu, Yongquan Lu, **Xusheng Wang**. Development of amplified consensus genetic markers in gramineae. (No. CN1769492)

GRANTS

CURRENT

NIH/NIAID R01

04/01/2022 - 03/30/2027

Title: Validation of a novel tau clearance mechanism

Total: \$500,000.00 (UND)

Goals: The goal is to examine a novel mechanistic link between oxidative stress and OTULIN activity via ABL1 during the progression of tauopathy.

Role: Co-I

NIH/NINDS R01

09/01/2021 – 08/31/2026

1.2 calendar MO

(Na)

Total: \$221,941 (UND)

Region-Specific Vulnerability Of The Lewy Body Dementia's Brain

Goals: The goal of this project is to understand the LBD pathogenesis mechanism, we must identify the proteome and transcriptome changes of multiple cell types and regions that comprise the brain.

Role: Co-I

UND VPR Seed Program

04/01/2021 - 03/30/2023

1 calendar MO

(Wang)

Total: \$150,000

*Artificial Intelligence (AI)-based Multi-omics
Data Integration for Alzheimer's Disease*

Goals: The goal is to provide an AI framework for disease outcome prediction, and ultimately patients will benefit from better prognosis and predictions based on their multi-omics profiles in the precision medicine era.
Role: PI

NIH/NIA RF1AG057181 Sub-award 04/01/2020 - 03/30/2022 0.6 Calendar MO
(Bu) Total: \$100,000 (UND)

Impact of ApoE2 on Aging-related Conditions

Goals: The goal of this project is to understand the molecular and cellular mechanisms by which the $\epsilon 2$ allele of the apolipoprotein E gene (APOE2) protects against Alzheimer's disease (AD), promotes healthy brain aging, and increases longevity, thereby informing the development of therapeutic strategies for AD and other aging-related conditions.

Role: co-I

NIH DaCCoTA 09/01/2021 - 08/31/2022 2.4 calendar MO
Feasibility Grant Total: \$56,000

*Integrated systems biology approach to
diabetic microvascular complications*

Goals: The goal is to identify chromatin structures maintained in cfDNA and to develop a powerful and robust AI-based prediction model for cancer diagnosis.

Role: PI

COMPLETED

University of North Dakota (UND) COBRE 10/01/2019 – 06/30/2020 0.6 Calendar MO
Epigenomics and Development and Disease, Total: \$30,000
Pilot Grant

Allele-Specific and Imprinted Expression of Mouse Brain Proteome

Goals: The goal of the proposal is to understand allele-specific and imprinted protein expression by profiling mouse brain proteome.

Role: PI

NIH/NIDA P30 (1P30DA044223-01) 09/01/2019 – 06/30/2021 0.6 Calendar MO
Pilot Grant Total: \$50,000

Genetic Regulation of the Rat Brain Proteome

Goals: The goal of this study is to understand genetic regulation of protein expression by profiling brain proteome of the HXB/BXH recombinant inbred (RI) rat panel.

Role: Project PI

UND COBRE HPI 04/01/2020 – 03/31/2021 0.6 Calendar MO
Pilot Grant (UND000021452) Total: \$32,000

Genetic Regulation of Host Proteome in Response to Salmonella Typhimurium Infection in Mice

Goals: The goal of the proposal is to understand genetic regulation of host protein expression in response to Salmonella Typhimurium infection in mouse.

Role: PI

ND EPSCoR STEM 10/01/2020 - 05/01/2021 0.6 calendar MO

*Predicting Clinical Outcomes of Alzheimer's
Disease Using Deep Learning Approach*

Total: \$5,000

Goals: The overarching goal of this project is to predict disease outcomes by combining multi-omic data and artificial neural network.

Role: PI

**UND College of Arts & Science
Collaborative Research Funding** 09/01/2020 - 08/31/2021 0.6 calendar MO
From Big Data to Precision Medicine

for Alzheimer's Disease

Total: \$20,000

Goals: The overarching goal of this project is to predict AD risk proteins by using multi-omics data obtained from existing molecular profiling studies, to determine the structural information of AD risk proteins, and to communicate up-to-date scientific findings to the general public.

Role: PI

PENDING

NSF CAREER

05/01/2022 – 04/30/2027

CAREER: Systems Proteomics Approach
to Bridging the Genome-to-Phenome Gap

Total: \$807,794.00

Goals: Our long-term goal is to construct signal transduction networks to bridge the genome-to-phenome relationship.

Role: PI

NIH/NIDA P30

07/01/2022 - 06/30/2027

Title: NIDA P30 Core Center of Excellence
in Omics, Systems Genetics, and the Addictome

Total: \$1,225,776.00 (UND)

Goals: The goal is to generate quantitative omic data for the Hybrid Rat Diversity Panel (HRDP), which include proteomic and metabolomic data using mass spectrometry (MS)-based technologies, DNA methylation data using microarrays, chromatin accessibility data with ATAC-seq, and transcript data by Iso-Seq.

Role: Core Lead

DoD Investigator Initiated Research Award

07/01/2022 - 06/30/2027

Title: Diet and high intensity interval training to treat
peripheral neuropathy in prediabetes and the metabolic syndrome

Total: \$737,822.00 (UND)

Goals: The goal is to identify the best MetS intervention, among DR, HIIT, and DR/HIIT, for treating PN in an animal model simulating the real lifestyle trajectories of military personnel and veterans.

Role: Co-I

NIH/NIDA R01

07/01/2022 - 06/30/2027

Title: Identification of Gene Variants Mediating the
Behavioral and Physiological Response to THC

Total: \$1,007,976.24 (UND)

Goals: The goal is to identify and validate genetic modulators of acute physiological responses to THC.

Role: Co-I
